

NAME: June

GENDER: Female

DOB: April 5, 2022

June is a petite grey and white tabby. She was turned over to a partner rescue in West Virginia after she was picked up wandering the streets. She is still a relatively young cat and is playful and gets zoomies around the foster room. She likes playing with Da Bird toy and chasing stuffed catnip toys.

June is a confident calm girl that doesn't react to other cats when they hiss or are otherwise antagonistic towards her. She has an understated yet dominant personality, so would do best with other cats (probably male is best) that are also well-balanced but not dominant. She would also do well as an only cat if she is in an environment where she gets mental and stimulation and physical exercise.

June likes to climb up to the top of the cat condo to nap and watch the birds. She is also quite playful and engaging with humans. June would do well in a busy house with kids, but she reacts negatively to the foster's dog.

June has a good appetite and will eat both canned and dry food. She likes drinking out of a fountain. She has good litter box manners and keeps her coat clean.

June has been spayed, microchipped, vaccinated for rabies and distemper, and tested negative for FeLV and FIV. She has been enjoying Fancy Feast classic pate and Purina One indoor kibble.
