

NAME: Derrick

GENDER: Male

DATE OF BIRTH: March 28, 2015

Derrick came to 4Paws from an independent rescuer in West Virginia. Derrick is a handsome brown tabby with bright green eyes and a white bib and feet. He is calm being placed into his top-door carrier and very tolerant of car rides (no car sickness or excessive meowing). Overall, he is a calm, mature cat that isn't initially shy, but would still need to be introduced to new spaces gradually.

Derrick will need a diet of canned food and limited high-quality treats because of a previous urinary issue. A diet of canned food will insure he is getting enough water to move things along. Thankfully he loves his Fancy Feast pate!

Derrick likes napping all curled up, catnip toys, watching the wind blow the leaves in the yard, and watching birds at the feeder. His foster said he can be picky about his cat friends but likes calm dogs. He would do best in a house with older children (12+) and can be an only pet. Derrick could probably get along with a younger (< 3 yrs) female cat who would be submissive to him after proper introductions.

Derrick has been neutered, tested negative for FIV and FeLV, given his vaccinations for rabies and FVCRP, and microchipped. He has been eating Fancy Feast pate.
