

NAME: Everest

GENDER: Male

DATE OF BIRTH: November 29, 2020

Everest was recently rescued as a stray and brought to a partner shelter in King George County, Virginia. 4Paws often takes cats from rural shelters where the supply of strays and unwanted animals outpaces the demand for pets because of the low population density. The rescues are transported to higher-density areas where their chances of getting adopted into loving homes is better

due to the higher population density.

Everest is a large black cat with light green eyes. Everest loves other cats and is curious by nature. He likes exploring new things and will help unpack the groceries and any new boxes that get delivered! Everest likes to interact with people and get lots of pets, but he is not comfortable being picked up. He can also be startled by loud noises. Because of these traits Everest would be best suited for a home with older children and another cat. Everest has not been tested with dogs. Once he has settled into his new home Everest will follow you around, sit at your feet and lay next to you.

Everest has been neutered, microchipped, tested negative for FeLV and FIV, and vaccinated.
