

NAME: Ginny

GENDER: Female

DATE OF BIRTH: August 4, 2021

Ginny is a polite, quiet little girl who was found being chased by two adult male cats down Virginia Street in West Virginia. Her rescuer saw her running and opened the door to let her in. He called a small rescue in Charles Town and they got her vetted, then turned her over to 4Paws to find a forever home.

Ginny is a very calm cat and on the small side. She may grow a little bit more but doesn't have a big appetite. She likes people and getting petted and played with. She didn't complain about being in a cage or when transported different places in a car. She should have a deep litter box because she likes to dig.

Ginny should get along with most cats and dogs and will tolerate children. She doesn't seem anxious or scared of much, but her presence seems to have a calming effect on some anxious cats.

Ginny likes both wet and dry food but may not eat as much as the larger cats. She has tested negative for FeLV and FIV, microchipped, and vaccinated. She is eating Fancy Feast classic pate and Purina One kibble.
