

NAME: Mew Mew

GENDER: Female

DATE OF BIRTH: January 3, 2021

Mew Mew was turned over to 4Paws by an independent rescuer in West Virginia. She had rescued several cats from her neighborhood that were most likely abandoned. She got them vetted and contacted several rescues so the cats could find good homes.

Mew Mew had been living in her rescuer's house for quite a while with the other cats and a couple of small dogs and was doing well. She is still young so should be adaptable to many home environments. She likes playing with fishing pole toys in foster and waits her turn to eat. She likes sitting in the sun and on her "S" shaped cat lounger. Mew Mew should get along with most cats and dogs and will tolerate respectful children.

Mew Mew likes both wet and dry food. She has tested negative for FeLV and FIV, is microchipped, and vaccinated. She is eating Fancy Feast classic pate and Purina One kibble.
