

NAME: Renesma

GENDER: Female

DATE OF BIRTH: August 22, 2022

Renesma was found outside in West Virginia and her owner could not be identified. Her examination revealed she had recently stopped lactating, so she probably was used to produce more beautiful Siamese mixes like herself and then let outside to find her own way.

Renesma was fully vetted before being turned over to 4Paws for Meows Corner. She prefers the company of kittens and will hiss at adult cats initially. Renesma could go with a younger kitty or on her own. She would do well with respectful kids. She is friendly but hesitant to be picked up unless it is by someone she trusts. She will tense up and try to wriggle free but does not lash out at the person. She saw her foster's mastiff dog through the storm door glass and was unfazed, so 4Paws assesses that Renesma would do OK with calm dogs that don't chase her.

Renesma loves watching the birds flitter around outside. In foster she would settle down behind the blanket storage chest after breakfast and dinner because she values her privacy. She would come out when called for pets and conversation.

Renesma has had her vaccinations, is microchipped, and has been spayed. She has tested negative for FeLV and FIV. She likes both wet and dry food but prefers wet food. She is eating Fancy Feast classic pate and Purina One kibble.
