

**NAMES:** Bixby and Finnegan

**GENDER:** Males

**DATE OF BIRTH:** February 1, 2024

Bixby and Finnegan are bonded brothers from Towson, Maryland. They were only 3 weeks old when 4Paws took them in. A young lady found them near her apartment and realized they needed medical intervention. They had colds and their eyes were infected. Unfortunately, Bixby's left eye did not develop correctly because of the infection. He has little vision in it and it is smaller than his right eye. He was assessed by a veterinary ophthalmologist, and she said the eye is not painful or prone to

infection now, so no additional medical treatments are needed. As he ages the skin around the eye should grow to look relatively normal, but the eye will be smaller.

They react well to other cats so could go to a multi-cat home. They should also do well with dogs if appropriate, slow introductions are utilized. They are super snuggly and purry and like to play roughly with each other as boy kittens tend to do. Bixby and Finnegan will need an active home and would do great with kids of all ages.

Both have been neutered, vaccinated against rabies and distemper, tested negative for FIV and FeLV, and microchipped. They are eating Fancy Feast classic pate and Purina One Indoor Advantage dry food.
