

NAME: Jordan

GENDER: Male

DATE OF BIRTH: April 1, 2016

Jordan is an owner surrender because his person had to move out of her apartment and find a more affordable place to live. Unfortunately, she couldn't afford the fees and extra rent for a pet on her own after her sister got married and moved to California. She was very sad because she had Jordan since he was a little kitten, although to look at the big guy now one wouldn't think he was ever *little* 😊.

Speaking of Jordan's weight, he got so large he could not groom himself along his spine, so developed mats which needed to be cut out. Although he is healthy, he needs to lose weight through being more active and reducing the amount of dry food he consumes. Although that is hard to do at the café, Jordan's adopter should be dedicated to helping him lose weight for his long-term health.

Jordan has never lived with other animals, so he isn't too sure about how he ended up living with a bunch of other cats. He is also curious about the random people that want to play with him and pet him. They have a kazillion new scents he needs to experience before he knows their stories. He is keeping his chin up, though, and likes friendly scratches – but only after the required introductory hand sniffs.

Because of his inexperience with dogs 4Paws assesses that Jordan should not be adopted into a home with a dog but would do well on his own. Since he is new to the café scene as of 2/23/2024, we are still observing Jordan's behavior around other cats to see if he would prefer living with another kitty or by himself.

Jordan has had his vaccinations, is microchipped, and has been neutered. He has tested negative for FeLV and FIV. He is eating Fancy Feast classic pate and Purina One kibble.
