

NAME: Sugar

GENDER: Female

DATE OF BIRTH: February 3, 2023

Sugar was living outside in Keyser, West Virginia when she was rescued. She has a cute underbite and fluffy longer fur. She is an attention hog, rolling over to get pets and rubs from everyone. Her right eye is discolored, and she was getting drops in it while in foster to make sure it was not injured. The drops didn't seem to make a difference so she was probably born with it discolored.

Sugar would do well in most situations if there are people to give her the attention she demands. Sugar does well with other kitties and should be OK with dogs if properly introduced. Because of her age she would adapt well to homes with children and other pets.

Sugar likes dry kibble and wet food.

Sugar has had vaccinations for rabies and distemper, is microchipped, and has been spayed. She has tested negative for FeLV and FIV. She is eating Fancy Feast classic pate and Purina One kibble.
