

NAME: Juno

GENDER: Female

DATE OF BIRTH: June 6, 2023

Juno was part of a colony of cats that were living in and around a hoarder's house in West Virginia. She is one of many grey tuxedo cats living there (Bronson and Clarice are also from her colony). Oftentimes when a large group of cats are left to reproduce within the group, a dominant genetic trait for color and pattern will emerge. Juno is still a little unsure of people, but she is playful and should come around as

she is immersed in positive interactions with humans at Meows Corner.

Juno likes retreating into corners and behind large objects to observe the other cats from a safe distance. She is estimated to be about a year old but is small in stature. She and Bronson share the unique facial feature of a little white dot on the right cheek.

Juno should be adopted with a friend from the café or into a home with a cat that is deferential and friendly to her. 4Paws assesses that Juno would not do well as an only pet because of her age and shy nature. She has not been assessed with dogs but should do well if the dog is friendly and doesn't chase her or bark a lot. She would do well with gentle, quiet children ages 8+ or in an adult-only home.

Juno has been vaccinated for rabies and distemper, is microchipped, and has been spayed. She has tested negative for FeLV and FIV.
