

**NAME:** Hoppy

**GENDER:** Female

**DATE OF BIRTH:** June 11<sup>th</sup>, 2020

**FUR LENGTH:** Short

**COLOR:** Brown tabby

**Purrsonality:** Hoppy was an indoor cat for a long time before being transferred to 4Paws for Meows Corner. She is super sweet, loves to headbutt, and will roll over for you. She also purrs a ton!

**Children:** Hoppy does well with children of any age; however, mature children would be preferred due to her injury.

**Other cats:** Hoppy would be okay with other cats, but they aren't needed.

**Dogs:** Hoppy would be okay with calm dogs.

**Background:** Hoppy was dropped off on a rescuer's property and was initially timid, running from people. When her rescuer tried to put her in a carrier, she disappeared for four days! As the weeks went by, she began accepting pets from her feeder until she acclimated to humans.

**Medical or special care notes:** Hoppy probably lost her lower leg in an attack when she was smaller, but it healed over on its own. She gets around like a normal cat and will play, jump, and run on it like normal. Hoppy has been spayed, vaccinated against rabies and distemper, tested negative for FIV and FeLV, and is microchipped. She is eating Fancy Feast classic pate and Purina One kibble.
