

NAME: Remina

GENDER: Female

DATE OF BIRTH: March 27, 2021

FUR LENGTH: Short

COLOR: Black torbie

**Purrsonality:** Remina is a girl with a lot to say and likes to do as she pleases. She likes light touches and will come to people for pets, but only if she wants them. She prefers to be mostly alone when she plays and will follow people for attention if she is feeling lonely. She will lie on you if you are reclined. Remina is a very heavy sleeper, but active, and has been known to toss herself off of towers and tumble to the floor. She will run and hide if strangers come to the door.

**Children?** Although she has never been around children, Remina should do OK with older kids 12+ that are respectful of her purrsonal space and patient with their interactions with her. She would also do well in an adult-only home.

**Other cats?** Remina would do best as an only kitty but could tolerate one or two other cats.

**Dogs?** Remina's former family had dogs so she would do OK with friendly dogs.

**Background:** Remina was surrendered to 4Paws with Paisley and Diesel when her human dad developed asthma. The family initially made other adjustments to the home to improve the air quality but he was still suffering, so his doctors recommended that the cats be rehomed.

**Medical or special care notes:** Remina has had vaccinations for rabies and distemper, is microchipped, and has been spayed. She has tested negative for FeLV and FIV. She is eating Fancy Feast classic pate and Purina One kibble.
