

NAME: Gale

GENDER: Male

DATE OF BIRTH: May 31, 2024

FUR LENGTH: Short

COLOR: Grey and white

Purrsonality: Gale is a friendly cat with people. He can enforce a “personal space” with other cats but 4Paws assesses that may be because Gale isn’t used to being around so many cats at once. He likes high places where he can escape if he feels overwhelmed or wants to nap in privacy. He is a good eater and can manage most diets without stomach upset. Gale likes his “passive entertainment” of watching wildlife out the window but will get bursts of energy where he wants to chase a teaser toy or the laser light.

Children? I would do well with respectful kids of all ages.

Other cats? I can be a single cat or live with another cat. I would do best with a younger female kitty for a companion.

Dogs? I have not been tested with dogs but should do well with calm, friendly dogs after proper introductions.

Background: Gale was rescued with Bramble and Meows Corner alum Clementine by a former Meows Corner employee. They appeared outside her house in rural Maryland, so she made friends with them and got them vetted to prepare for adoption. Gale was already neutered so he must have been a pet to someone at one time.

Medical or special care notes: Gale is vaccinated for rabies and distemper, microchipped, and has been neutered. He has tested negative

for FeLV and FIV. He is eating Fancy Feast classic pate and Purina One kibble.
