

NAME: Tigger

GENDER: Male

DATE OF BIRTH: August 19, 2024

FUR LENGTH: Medium

COLOR: Orange/White

Purrsonality: Tigger can be a little shy and nervous in new situations but he warms up quickly with some slow, reassuring pets. Once he comes out of his shell, his full personality is shown. He is very friendly, and will hop up on the couch and chairs to get your attention for pets. He would do well in most any home!

Children: Tigger would likely do well with calm, respectful children of all ages.

Other cats: Tigger enjoys the company of other cats but can be adopted as a single cat.

Dogs: Tigger has not been tested around dogs, but could do well with calm, friendly dogs after proper introductions.

Background: Tigger came from Martinsburg, West Virginia with Louie. A girl put him on Facebook because she was moving away. A lady took him in, but couldn't afford to keep him well-fed, so he lost a lot of weight. He was surrendered to a cat rescuer who got him connected with 4Paws, so he could live at Meows Corner and wait on his forever home!

Medical or special care notes: Tigger has been neutered, vaccinated against rabies and distemper, tested negative for FIV and FeLV, and is microchipped. He is eating Fancy Feast classic pate (no seafood flavors) and Purina One Indoor Advantage kibble.
