

NAME: Paisley

GENDER: Female

DATE OF BIRTH: March 13, 2021

FUR LENGTH: Short

COLOR: Copper torbie

Purrsonality: Although Paisley got along with Diesel, Remina, and the family's dogs, she prefers to be by herself more often than the other cats. She does not like to be held but likes to be close to you. Sometimes she will get chatty with you and have little conversations. Paisley likes sleeping under a blanket or in a covered cat bed. She is more skittish and she and Remina will run and hide when new people come to the house.

Children? The family did not have children so she would probably not do well with younger kids. Older kids (12+) that know how to be respectful of Paisley and are generally quiet should be OK.

Other cats? Paisley should do best as a single kitty but can tolerate one or two other cats.

Dogs? Paisley's previous family had a dog so she would do well with friendly dogs.

Background: Paisley was surrendered to 4Paws with Remina and Diesel when her human dad developed asthma. The family initially made other adjustments to the home to improve the air quality but he was still suffering, so his doctors recommended that the cats be rehomed.

Medical or special care notes: Paisley has had vaccinations for rabies and distemper, is microchipped, and has been spayed. She has tested negative for FeLV and FIV. She is eating Fancy Feast classic pate and Purina One kibble.
