

NAME: Agatha

GENDER: Female

DATE OF BIRTH: August 19, 2023

FUR LENGTH: Short

COLOR: Black tuxedo

Purrsonality: Agatha didn't come with a lot of background information. She is timid and likes to be slowly approached and petted gently.

Children? I would do well with older children 14+ or with adults only.

Other cats? I can be a single cat, but if I was adopted into a home with a resident cat, I would need that cat to be of a gentle nature.

Dogs? I should do well with calm, friendly dogs.

Background: Agatha was an owner turn-in from Berkeley County, West Virginia.

Medical or special care notes: Agatha is vaccinated for rabies and distemper, microchipped, and has been spayed. She has tested negative for FeLV and FIV. She is eating Fancy Feast classic pate and Purina One kibble. Her estimated age seems old to 4Paws volunteers, but that is what is on her records.
