

NAME: Diesel

GENDER: Male

DATE OF BIRTH: July 28, 2022

FUR LENGTH: Short

COLOR: Grey and white

Purrsonality: Diesel is calm but curious, and quiet unless he is playing and romping around. He has never hissed or growled at other cats or people. He is submissive and likes hanging out with other friendly, easy-going cats. He is well-socialized with people. He likes to spend his time looking outside. Diesel will sleep all stretched out so should have large bedding surfaces available. He is not a fan of being held but will come and lie next to you or get in your lap when you are watching TV or reading

Children? The family did not have children but Diesel should be OK with respectful kids since he is a younger cat.

Other cats? Diesel would probably be happiest living with another cat because of his relatively young age, but is not bonded with Remina or Paisley.

Dogs? Diesel's previous family had a dog so he would do well with friendly dogs.

Background: Diesel was surrendered to 4Paws with Remina and Paisley when his human dad developed asthma. The family initially made other adjustments to the home to improve the air quality but he was still suffering, so his doctors recommended that the cats be rehomed.

Medical or special care notes: Diesel has had vaccinations for rabies and distemper, is microchipped, and has been neutered. He has tested negative for FeLV and FIV. He is eating Fancy Feast classic pate and Purina One kibble.
