

NAME: Damari

GENDER: Female

DATE OF BIRTH: September 6, 2020

FUR LENGTH: Long

COLOR: Dilute tortie

Purrsonality: Damari will be shy initially but will warm up if given her own time to integrate. Damari responds well to humans who give her the “slow blink” to show friendship. Although she likes being around humans, she isn’t a lap cat. Instead, she prefers to settle in next to you on the couch to get scratches and exchange slow blinks and eye contact. She needs a quiet, serene home with relaxed vibes.

Children? 4Paws assesses Damari would not do well with toddlers. Older kids who know how to be respectful around animals should be OK.

Other cats? Damari can be by herself or with other calm, friendly cats.

Dogs? Damari did not react to her foster’s mastiff as a kitten but her previous adoptive family did not have any other pets. The lack of continuous exposure may have made Damari wary of dogs if they bark a lot or take excess interest in her. Integration protocols should be followed if there is a resident dog.

Background: Damari and her littermates were born to feral parents in West Virginia. The litter had to be trapped a few at a time. She was adopted by a couple with no children, but returned 3 years later because they had a baby and were struggling to care for the baby and Damari simultaneously.

Medical or special care notes: Damari has had vaccinations for rabies and distemper, is microchipped, and has been spayed. She has tested negative for FeLV and FIV. She is eating Fancy Feast classic pate and Purina One kibble.
