

NAME: Piper

GENDER: Female

DATE OF BIRTH: Oct. 8, 2024

FUR LENGTH: Short

COLOR: Silver tabby

Purrsonality: I am a chatty girl and will tell my story to whoever is willing to listen - loudly. I like to greet people and get scratches while I butt your hands with my head and try to convince you to take me home.

Children? I would do great with older kids 12+.

Other cats? I can go as a single kitty.

Dogs? I probably wouldn't do well with dogs.

Background: Piper was an owner turn-in after her adopter tried to integrate her into a home with another cat that rejected her. She was young when adopted (6-7 months) and cats are pretty adaptable at that age, but Piper has a sassy side and wasn't going to tolerate that kind of harassment, so would defend herself. When she was transferred to the café, it became a "socialization 101" class for her – the cats were neutral when she hissed and gave her space when they sensed her tension, which made her relax and gradually realize other cats can be friendly and fun to be around.

Medical or special care notes: Piper has had vaccinations for distemper and rabies, is microchipped, and has been spayed. She has tested negative for FeLV and FIV.
