

**NAME:** Moo

**GENDER:** Male

**DATE OF BIRTH:** May 3, 2025

**FUR LENGTH:** Short

**COLOR:** Black and white

**Purrsonality:** Moo is intensely human-oriented and curious. He wants to be near you so badly he will try to climb behind you after jumping on your shoulders. He will try to climb into the bath with you, and is fascinated with water. In fact, his foster said he would probably want to play in a running shower if given the chance to sneak in. Moo is smart, and he needs more mental stimulation than your average kitty. He would be a great candidate to learn tricks like “high-fiving” and fetch, and jumping onto a shoulder when prompted versus when he feels like it. He would do best with someone that appreciates his need for attention and interaction with humans.

**Children:** Moo would love being friends with children of all ages.

**Other cats:** Moo needs a cat or dog friend to give him balance and help him focus on something else when the humans aren’t available.

**Dogs:** Moo has not been tested with dogs but should do well with calm, friendly dogs. He shows no fear of other animals.

**Background:** Moo is from Hedgesville WV and was turned in to rescue because his owner was moving. He has lived with Stachy.

**Medical or special care notes:** Moo has been neutered, vaccinated against rabies and distemper, tested negative for FIV and FeLV, and is microchipped. He is eating Fancy Feast pate wet food and Purina One kibble.
