

NAME: Remy

GENDER: Female

DATE OF BIRTH: Sept. 24, 2024

FUR LENGTH: Short

COLOR: Brown tabby/Abyssinian mix

**Purrsonality:** Remy is a playful and sweet girl that likes napping in high places and playing with other cats. She may be initially shy until she is comfortable in her new home but once settled in, she will be a great kitty companion. Remy doesn't shed and has good eating and litter habits.

**Children?** Remy will do well with older kids 12+ that can be quiet and patient with her during her transition into the home.

**Other cats?** Remy will need to be adopted with another cat or into a home with a cat that can welcome her at her pace socially.

**Dogs?** Remy would most likely do better without dogs given her history.

**Background:** Remy and another young cat were found in DC in a bad neighborhood. They were taken into foster but the foster's home was overcrowded and they didn't have a lot of money to spend on the kittens' care. An independent rescuer that works with 4Paws arranged for their vetting and they were transferred to the café.

**Medical or special care notes:** Remy has had vaccinations for rabies and distemper, is microchipped, and has been altered. She has tested negative for FIV and FeLV. She is eating Fancy Feast classic pate and Purina One kibble.
