

**NAME:** Clementine

**GENDER:** Female

**DATE OF BIRTH:** March 14, 2025

**FUR LENGTH:** Short

**COLOR:** Orange tabby

**Purrsonality:** Clementine is a sweet orange tabby girl that likes soaking up the sun and gently playing with her cat and human friends. She is not fond of rough play but seems entertained by the tumblers and wrestlers going at it at the café. When you pick her up she gives you a sweet little “mew” and relaxes in your arms.

**Children?** I would do well with older children, 10+.

**Other cats?** I like other cats but I am independent so could go as an only cat.

**Dogs?** I should do well with friendly dogs.

**Background:** Clementine was found with Bramble and Gale near the woods by a former Meows Corner employee's house in rural Maryland. Her rescuer arranged to get veterinary services done and worked with 4Paws to provide all three cats a chance at a safe, loving home where they could thrive.

**Medical or special care notes:** Clementine is vaccinated for rabies and distemper, microchipped, and has been spayed.\* She has tested negative for FeLV and FIV. She is eating Fancy Feast classic pate and Purina One kibble.

\*The vet that spayed her used a “flank spay” technique where the incision is on the side rather than the belly. This has advantages like less discomfort and faster recovery but looks a little silly because the fur is shaved down one side of her body.
