Background: Kenzie was the only female in a litter of 7 kittens born in foster at 4Paws. She was in foster and taken to adoption fairs, where she got some interest and applications, but nothing ever panned out. Kenzie's brothers and mother were adopted from Meows Corner, and now, it is her turn!

Medical or special care notes: Kenzie's left eye is cloudy from scarring from an infection when she was young, but she can see out of it. Kenzie became ill with a viral infection and spent months recovering. Inflammation along her spine affected her rear legs, but the more she exercises, the stronger they get. Kenzie is vaccinated for distemper and rabies, spayed, and microchipped. She tested negative for FeLV and FIV. She has been eating Fancy Feast Pate (no fish flavors) and Purina One Indoor Advantage turkey kibble.
